

POLICY STATEMENT

Footscray City Films is committed to providing the best learning environment possible for every student. This includes students with learning disabilities and language disabilities.

Footscray City Films require a solid comprehension of the English language at a pass level at Year 12 and the ability to perform mathematical calculations to at least a year 10 level.

If a student is accepted into a program with Footscray City Films, we would presume that they already have these basic skills. Students who do not have basic literacy, language and numeracy skills will need to get additional help. There will be a meeting set up between the Head of the Film School and the student and additional LL&N tuition may need to be undertaken to assist the student.

This additional assistant will be at an additional cost to the student, however Footscray City Films will assist in any way possible to source an appropriate tutor.
